EXPERIENCE

Cocooning Finance

Software Engineer · Laval, QC · Oct 2024 – Present

- Building a **multi-tenant CRM platform for financial advisors** (Ruby on Rails / PostgreSQL), centralizing client portfolios, insurance products, succession planning, and compliance documentation in a single system.
- Designed and implemented a **compliance-aware case management module** linking tasks, documents, and audit trails to client records — increasing user engagement by **12%** (measured via weekly active sessions).
- Optimized slow database queries and introduced **Redis caching on high-traffic endpoints**, reducing average API response times by **30%** and cutting P95 page-load latency across the advisor dashboard.

Illuxi

Software Engineer → Team Lead · Montréal, QC · Apr 2022 – Sep 2024

- Full-stack engineer on **illuxiLMS**, a bilingual learning management system serving **200,000+ learners/month** across government agencies, school boards, and enterprise clients (TD Bank, City of Longueuil, Montreal CSSPI).
- Implemented new platform features, contributed to DevOps workflows (CI/CD pipelines, AWS deployments), and shipped bug fixes across the LMS and an internal FinTech application.
- Promoted to Team Lead: ran sprint planning, owned the PR review pipeline, and coordinated deliverables across engineers and product, **improving sprint velocity by 40%**.
- Led stakeholder syncs to scope features and triage bugs, raising post-release **satisfaction scores by 25%** (NPS surveys).

Agency of Learning

Software Engineer (Contract) · Remote · Nov 2023 – Feb 2024

- Contributed features to **candidate.fyi**, a hiring-workflow SaaS — built API integrations and front-end components in a pair-programming environment with senior engineers.

Bellow Media

Software Engineer · Montréal, QC · 2019 – 2022

- Built full-stack web applications (Vue 3 + Rails) for a Canadian NGO and a school, redesigning donation flows that **increased online donations by 11%**.
- Delivered WordPress and Vue 3 static sites and landing pages on compressed timelines for non-technical stakeholders.

TECHNICAL SKILLS

Languages	Ruby, JavaScript/TypeScript, SQL, Elixir, C, Java, PHP
Frameworks	Ruby on Rails, Sinatra, Rack, Bridgetown, Vue.js, React, Phoenix
Data & Infra	PostgreSQL, MySQL, Redis, MS SQL Server, AWS (EB, S3, Lightsail), Docker, Heroku, Render, Fly.io, Digital Ocean, CI/CD
Practices	System Design, Code Review, Agile / Scrum, Pair Programming, Performance Profiling

EDUCATION

B.S. Software Development

OpenClassrooms University · Jan 2020 – Apr 2022 · France

COMMUNITY

- RailsConf, RubyConf 2022, Rails World 2024 attendee
- Volunteer mentor — firstrubyfriend.org
